***Election/Restrictions***

This application contains claims directed to the following patentably distinct species:

I. Species corresponding to Fig. 6, an embodiment of inferring a color space and performing a prescribed processing to the image data (the examiner believes that claims 1-18 and 27-36 are in this species).

II. Species corresponding to Fig. 2, a distinct embodiment of judging information indicating a color space and performing a prescribed processing to the image data if the color space satisfies a prescribed condition (the examiner believes that claims 19-26, 37-41 are in this species).

The species are independent or distinct because they have different operating modes and different functionalities.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 2624

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
